## **Livepeer Retro-Active Grant Funding Application - Entry #7**

Name or Nickname	Pablo
Contact Email	hidden
Recipients ETH Address	streameth.eth
Lens Handle (if applicable)	streameth.lens
Project Title	StreamETH
Project Description	StreamETH is an open-source, decentralised, Web3 event-hosting platform and community archive. It aims at decentralizing Ethereum content live delivery and archiving, making it censorship resistant, immutable and giving ownership of it to the community. StreamETH is built on top of Livepeer's technology since day 0 and contributes to Livepeer's development with constant feedbacks and development contributions. The StreamETH platform has been used in over 90 countries and used Livepeer's tech to deliver over 300k minutes of content, which created a great testing ground for Livepeer to actually have feedbacks on how scalable the video infrastructure is. On top of that, StreamETH contributes to the ecosystem by advertising Livepeer's technology to every person that uses the platform, effectively bringing more people close to the Livepeer ecosystem and into the project.
Duration of the Completed Project	April 18, 2022 - Present day
Project Impact	Through the StreamETH platform, the Livepeer tech has:
	<ul> <li>Reached 90+ countries</li> <li>Reached 6 continents</li> <li>Reached 40+ Ethereum Communities</li> <li>Gathered 12k+ unique users</li> <li>Delivered over 300k minutes of content</li> <li>Developed new features</li> </ul>
Team Members	- Pablo, Founder - Filippo, Marketing Lead - Xander, Production Lead - Samuel, Tech Lead
Is the project open source?	Yes
GitHub Link: (if applicable)	https://github.com/streamethorg/streameth-platform

Technology Stack	nextjs
	livepeerjs
	livekit
	node & expressjs
Explanation of Retroactive Funding Use	The StreamETH Platform is in constant development and improvement. The retroactive funding will be used to support ongoing maintenance and finance future operations to enhance impact.
Community Engagement	StreamETH's funder, Pablo has been an active contributor in the Livepeer community since way before the beginning of the project, and, of course, all through the development, until the present day. Participating in community calls weekly and being always in contact with the ecosystem.
Collaboration	We have been in close collaboration with the livepeer and livepeer studio team since 2018.
