

Livepeer Retro-Active Grant Funding Application - Entry #13

Applicant Information	
Name or Nickname Who is the main point of contact for this application?	Ramit Agarwal
Contact Email	hidden
Recipients ETH Address Address to where funds will be delivered if the applicant is awarded funds? NOTE: All LPT funds are on the Arbitrum network	0x905040585A59C5B0E83Be2b247fC15a81FF4E533
Lens Handle (if applicable)	phi_ramit
Twitter Handle (if applicable)	phi_ramit
Discord Handle (if applicable)	Empty
Project Information	
Project Title	Huddle01
Project Description Please provide a brief overview of your project, its objectives, and how it has benefited the Livepeer ecosystem.	We built our custom token gated live streaming feature as part of our meeting platform.
Duration of the Completed Project Specify the period during which the project was active or completed.	We built the livestreaming feature using livepeer during the Sept 2021 and later on we added the token gated feature over the livestreaming feature
Project Impact Describe the impact your project has had on the Livepeer ecosystem,	We provide the space for different to carry out their live streaming over our platform with the added ability of token gated sessions We had over 1830 session over the platform & total 1004 assets stored.

including any measurable results or outcomes.

Team Members

List the team members involved in the project, including their roles and relevant experience.

It was built by:

Deepanshu Singh
(Lead Developer)

Akshit Gupta
(Full Stack Developer)

Ramit Agarwal
(Tech Product Manager)

Technical Details

Is the project open source?

No

GitHub Link: (if applicable)

Empty

Technology Stack

List the technologies, languages, and frameworks your project is based on.

We use Next js for our frontend & node js for our backend, as meeting platform we leverage the basics of webRTC to enable the realtime communication and MediaSoup is used as SFU to achieve the scalability at the same time

Explanation of Retroactive Funding Use

Explain how the retroactive funding will be used, such as to cover past expenses, support ongoing maintenance, or further enhance the project's impact.

We will use to cover our past development cost & to maintain it in future with constant upgrades like adding live-peer in support for multi-streaming.

Community Engagement

How have you engaged with the Livepeer community and users during and after the project's completion to promote its benefits and adoption?

Empty

Collaboration

Have you collaborated with other Livepeer developers or projects? If so, how?

Empty

Additional Information

NA

Any additional information or details you would like to share with the Retroactive Grant DAO regarding your project or retroactive funding request.

Supporting Documentation[Capture-2024-04-17-153240.png](#)

Please attach any relevant documentation, such as project proposals, technical specifications, or mock-ups, that will help us better understand your project.
